

2026 Kia Niro EV Wind+

RECOMMENDATION Get the written, VIN-specific lease worksheet now.

The deal meets all four targets. Proceed only if a dealer reproduces it, confirms delivery by September 30, and itemizes every fee; a deposit alone may not preserve delivery-based programs.

The quoted payment is internally consistent**\$189.49** bi-weekly · HST included

TERM	ALLOWANCE
48 months / 104 payments	20,000 km per year
RATE	CASH DOWN
2.49% APR	\$5,000
RESIDUAL	INCENTIVES USED
\$27,075.48	\$4,000 Kia + \$5,000 EVAP

Pre-HST payment = $189.49 / 1.13 = \$167.69$
 $r = 2.49\% / 26$; $n = 104$
 $PV = 167.69 \times 98.9435 + 27,075.48 / (1+r)^{104}$
 $PV = \$41,101.74$ after the \$5,000 down payment
 Implied capitalized amount before down: **\$46,101.74** - about \$2,825 above the calculator's \$43,276.39 sale-price line. That gap is plausible for delivery/fees, but must be itemized. This reconciles the payment; it is not a contract quote.

Four-year outlay: $104 \times \$189.49 + \$5,000 = \$24,706.96$, before separate delivery-day amounts. A buyout adds residual, tax and any purchase-option fee.

Today's deal clears every standing limit

Above-base trim	Wind+ (NE152T)
MSRP	\$48,595
Kia Fall Bonus	-\$4,000
Net before EVAP	\$44,595
EVAP on 48-mo lease	-\$5,000
Lease APR	2.49%
Target payment	\$150-\$200
Quoted payment	\$189.49

The 2.49% rate reflects the 3.49% 48-month base rate less the 1-point Kia loyalty reduction for an eligible customer. Approval is on approved credit.

Waiting creates a \$0-or-\$56 bi-weekly fork

OCTOBER SCENARIO	MODELED PAYMENT	48-MO DIFFERENCE
Program renewed unchanged	\$189.49	\$0
Rate +1 point; bonus retained	\$204.46	+\$1,556
\$4,000 Kia bonus ends; rate unchanged	\$229.92	+\$4,204
\$4,000 bonus ends + rate +1 point	\$245.69	+\$5,845

Prudent waiting budget: +\$40-\$56 bi-weekly (+\$4.2k-\$5.8k over the term); upside is a \$0 change if renewed. Assumes the same residual, fees, HST and \$5,000 down. These are sensitivities, not an October forecast. EVAP remains eligibility- and funding-dependent.

The next move is a written in-stock quote

1. Open the [configured Kia build](#) and save a screenshot.
2. Contact a Kia dealer with a Wind+ physically available. Ask for the VIN and confirmation it can be delivered by September 30.
3. Request the full lease worksheet before giving card details. Match all figures below.
4. Have the dealer confirm when it will submit EVAP eligibility.
5. Sign only if the worksheet stays at or below **\$200 bi-weekly tax-in**, with no mandatory add-on.

Copy/paste: "Please send a written lease worksheet for an in-stock 2026 Niro EV Wind+ (NE152T): 48 months, 20,000 km/year, bi-weekly, \$5,000 down, 2.49% after Kia loyalty, \$4,000 Kia bonus, \$5,000 EVAP, HST included, residual \$27,075.48 and quoted payment \$189.49. Include VIN, every fee/add-on, total due at signing, excess-km charge, purchase-option fee, and confirmation of delivery by September 30."

Stop: wrong trim; delivery after September 30; payment above \$200; rate above 2.99%; EVAP not confirmed; or compulsory add-ons/fees absent from the quote.
